Experience

JPMorganChase Tampa, FL

CIB Fraud Prevention Data Analytics Associate June 2025 – Present

- Led high-impact FinCEN and regulatory-support analytics, managing 170+ ad-hoc inquiries with 95% completed within 48 hours and a 0% defect rate. Co-led government-format reporting for 4,000+ transactions and developed procedures, quality checks, and reusable reference assets that improve consistency, auditability, and data integrity.
- Delivered 250+ Alteryx Server deployments across new workflows, enhancements, servicing, and production updates, and scaled the team's automation environment to support 100+ daily automated runs, including scheduled daily distribution to senior leadership via email and Tableau dashboard refreshes. Eliminated about 11,000 minutes of manual work per week while improving fraud analytics throughput, reliability, and stakeholder visibility.
- Led the response to a data lake schema change affecting 60+ workflows, queries, and reporting processes: sustained manual stakeholder reporting during the outage, restored production workflows, and implemented a dynamic schema/query standard to reduce future operational, audit, and regulatory risk.
- Delivered 16 marquee ad-hoc fraud analyses and supported 100% on-time Commercial & Investment Bank (CIB) monthly business review (MBR) reporting across 3 global hubs and the APAC, WHEM, EMEA, and NAMR regions, including attendance and productivity reporting, translating complex data into actionable insights for Fraud, Recovery, Operations, and leadership stakeholders.
- Strengthened fraud reporting, controls, and stakeholder enablement through a platform recertification, firmwide Alteryx SAML/SSO support with a 100% success rate, status reporting, case triage, and analytics support for a multi-phase fraud initiative, partnering across strategy, operations, compliance, technology, and data teams.

CIB Fraud Prevention Product & Operations Corporate Analyst July 2023 - May 2025

- Utilized SQL within AWS Athena to write 30+ queries using joins, JSON extract, clauses, and creating tables for critical payment-focused business cases, including fixing records, validating tables for new products, and supplying data for onboarding a new fraud project engine, while leading meetings and collaborating with tech and strategy leaders in the Corporate Investment Bank Product space
- Integrated SQL knowledge to analyze data with 25+ combined Alteryx workflows & applications to develop new reporting solutions, provide further analysis & quicker processing speed to existing workflows, and validate information by reporting nearly 1K missing data lake entries
- Partnered with product leads to develop an Alteryx solution for reporting across three unique payment types & databases with millions of client payment transactions for use by Product, Strategy, Operations, and Commercial Bank Fraud teams
- Collaborated with Cybersecurity Technology Control (CTC) leads to develop updated industry standard procedures for JPMC senior management based on a CTC security test, and presented in a virtual webinar with over 200+ attendees for JPMC employees to implement new methods, better protecting employees, and improved firmwide observability
- Assisted in preparing and leading technical and operational readiness for payment feature releases, each improving fraud detection capabilities on JPMorgan's fraud detection engine systems, totaling ten significant successful platform releases
